## **OVERVIEW**

This qualification is for those interested in developing a career in Automobile Mechanic Works for the award of National Skills Qualifications (NSQ). It is aimed at producing specialists in Automobile Mechanics and repairs at NSQ Levels 1, 2 and 3 with the competencies to repair automobile faults professionally: while complying with relevant regulatory requirements, health and safety. This qualification is subject to review as and when the need arises.

## **GENERAL INFORMATION**

### **PURPOSE OF THE QUALIFICATION**

This qualification is designed for individuals who are interested in developing a career in the Tricycle Assembling, Repairs and Maintenance.

### **ENTRY REQUIREMENTS**

Candidates must fulfil the following requirements:

1. Be at least 15 years of age
2. Be medically fit (i.e., free from; visual problem, blood pressure and blood sugar)
3. Be mentally fit
4. Have completed Primary School education and or vocational training program related to the intended area of training.
5. A candidate may be considered in lieu of No. 4. above, if he or she has basic literacy and numeracy skills or can relatively read and write in the language of Instruction of the program.

Note:

This is a 180 credit hour program, and learners are required to attain all the credit units. Each Credit is approximately equivalent to 10 Guided Learning Hours (GLH).

### **GENERAL OBJECTIVES**

At the end of the program, the trainee should be able to demonstrate knowledge and skills in:

1. Demonstrate Health, Safety and Environment
2. Apply Communication Process in an Automotive Environment
3. Demonstrate Team Work
4. Identify and use Basics Tools in Tricycle Assembling and Repair Maintenance
5. Identify and use Basic materials use in tricycle maintenance, assembling and repairs
6. Carryout Fastening and Joining Techniques in Tricycle Assembling and Repair Maintenance
7. Carry out Engine System Maintenance of Tricycle

### **Unit assessment requirements/evidence requirements:**

Assessment must be carried out in real work environment in which learning and human development is carried out. Simulation is allowed in this units and level (where/when necessary).

### ***Assessment methods to be used include:***

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS) or Reflective Practice (RP)
5. Recognition of Prior Learning (RPL)

| 3          | AUT/TRC/003/L1 | Basic Tools in Tricycle Assembling and Repair Maintenance                      | 3            | 30                  | Mandatory |
| 4          | AUT/TRC/004/L1 | Basic materials use in tricycle maintenance, assembling and repairs            | 3            | 30                  | Mandatory |
| 5          | AUT/TRC/005/L1 | Fastening and Joining Techniques in Tricycle Assembling and Repair Maintenance | 3            | 30                  | Mandatory |
| 6          | AUT/TRC/006/L1 | Team work  | 1            | 10                  | Mandatory |
| 7          | AUT/TRC/007/L1 | Engine System Maintenance of Tricycle  | 4            | 40                  | Mandatory |
|            |                | TOTAL CREDIT VALUE/HOURS   | 2            | 180                 |           |

**Purpose of the Qualification:**

This Qualification covers the competence and knowledge learners need to identify in maintenance, service and general repairs of auto tricycles. It includes identification of faults and replacement of mechanical and electrical components safely. The qualification also ensures that the learner is aware of health & safety, the environments, and appropriate communication. The candidate should be able to identify tools and equipment for the purpose of maintenance.

**Unit: 1 HEALTH, SAFETY AND ENVIRONMENT (HSE) IN AUTOMOTIVE TRI CYCLE INDUSTRY****Unit reference number: AUT/TRC/001/L1****QCF level: 1****Credit value: 2****Guided learning hours: 20**

**Purpose of the Unit:** This unit is about the application of knowledge and skills to competently carryout daily activities in an automotive tricycle workshop while observing relevant safety procedures and regulations.

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out. Simulation is not allowed in this unit and level.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome)                                      | Criteria:- | Evidence Type  |  | Evidence Ref Page number |
|---|------------|--|--|--------------------------|
| L.O:1Employ safe work practices and instructions            | 1.1        | Identify safe work practice and instructions.                                  |  |                          |
|   | 1.2        | Identify safety signs and symbols.   |  |                          |
|   | 1.3        | Identify signs and symbols correctly   |  |                          |
|   | 1.4        | Explain safe work practices and instructions                                   |  |                          |
|   | 1.5        | Work in accordance with health and safety practices.                           |  |                          |
| L.O 2: Identify safe ty hazards and risks at work           | 2.1        | Identify work environment hazards  |  |                          |
|   | 2.2        | State the types of hazard and risks in surface area                            |  |                          |
|   | 2.3        | State the types of hazards and risks in height and depth                       |  |                          |
|   | 2.4        | Explain the regulations as it relates to hazards and risk in work environment. |  |                          |
| L.O.3: State the use of Personal Protective Equipment (PPE) | 3.1        | Identify the types of PPEs   |  |                          |
|   | 3.2        | Explain PPEs in accordance with instructions.                                  |  |                          |
|   | 3.3        | Identify appropriate PPEs.   |  |                          |
|   | 3.4        | Service PPEs after use.  |  |                          |

| L.O (Learning outcome)   | Criteria:- | Evidence Type  |  | Evidence Ref Page number |
|--|------------|--|--|--------------------------|
| L.O. 4: Apply appropriate measures during accident/injury.                                     | 4.1        | Identify first aid facility  |  |                          |
|  | 4.2        | Identify basic dressing materials  |  |                          |
|  | 4.3        | Comply with supervisors' instructions.   |  |                          |
|  | 4.4        | Communicate accident/injury to the appropriate supervisor  |  |                          |
| L.O. 5: Observe safe working habit and clean work environment                                  | 5.1        | Identify safe access and exit routes in the work environment   |  |                          |
|  | 5.2        | Identify appropriate working tools, materials and equipment  |  |                          |
|  | 5.3        | Identify the use of tools and equipment safely in accordance with the supervisor's instructions                |  |                          |
|  | 5.4        | Gather all tools, equipment and unused materials for appropriate storage                                       |  |                          |
|  | 5.5        | Explain general housekeeping of work environment   |  |                          |
|  | 5.6        | Dispose all wastes appropriately to designated waste facilities  |  |                          |
| L.O: 6. Apply the appropriate methods of lifting, loading/offloading and stacking of materials | 6.1        | Identify lifting and stacking techniques   |  |                          |
|  | 6.2        | Explain appropriately lifting techniques in loading and offloading of materials without assistance             |  |                          |
|  | 6.3        | Select correct lifting and loading techniques with mechanical assistance                                       |  |                          |
|  | 6.4        | Gather materials correctly   |  |                          |
| L.O: 7 State the effects of materials on self and work environment                             | 7.1        | Explain the effect of gas, liquid and solid materials on self and work environment                             |  |                          |
|  | 7.2        | Identify various types of protection against gaseous, liquid, and solid materials on self and work environment |  |                          |
|  | 7.3        | Explain appropriate legislative standards with regards to safety   |  |                          |

**UNIT 2: COMMUNICATION IN AUTO TRICYCLE WORKSHOP****Unit reference number: AUT/TRC/002/L1****QCF level: 1****Credit value: 2****Guided learning hours: 20**

**Unit Purpose:** To establish an effective communication system that is responsive to change in meeting workers and client's needs, in work environment

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)

| L.O (Learning outcome)  | Criteria:- |   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|---|------------|---|---------------|--|--|--|--------------------------|--|--|--|
| L.O:1.0 Identify non-complex communication system in a work environment | 1.1        | Identify the use of verbal means to pass on necessary information                           |               |  |  |  |                          |  |  |  |
|   | 1.2        | Identify the use non-verbal means to convey necessary information e.g. body language, signs |               |  |  |  |                          |  |  |  |
|   | 1.3        | Distinguish between symbols and signs appropriately   |               |  |  |  |                          |  |  |  |
| L.O: 2.0 Utilise information in a work environment                      | 2.1        | Identify the source of information in the work environment                                  |               |  |  |  |                          |  |  |  |
|   | 2.2        | Identify how to communicate effectively with the source of information                      |               |  |  |  |                          |  |  |  |
|   | 2.3        | Identify the different information flow systems in a work environment                       |               |  |  |  |                          |  |  |  |
|   | 2.4        | Explain how to use information gathered to avoid challenges in a work situation             |               |  |  |  |                          |  |  |  |
|   | 2.5        | Report findings appropriately in accordance with laid down                                  |               |  |  |  |                          |  |  |  |

**Unit 3: TEAM WORK****Unit reference number: AUT/TRC/006/L1****level: 1****Credit value: 1****Guided learning hours: 10**

**Unit Purpose:** The purpose of this unit is to impart to the learner, skills, knowledge and understanding required to develop team spirit and positive working relationship.

**Unit assessment requirements/evidence requirements:** Assessment must be carried out in real workplace environment in which automotive services and repair operations are carried out. Simulation is not allowed in this unit and level.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome)                                     | Criteria:- |  | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|------------|--|---------------|--|--|--|--------------------------|--|--|--|
| LO1: Utilize Positive working relationship with colleagues | 1.1        | Identify the need for developing positive relationship with colleagues.                                    |               |  |  |  |                          |  |  |  |
|  | 1.2        | Recognize the importance of relating with other people in a way that makes them feel valued and respected. |               |  |  |  |                          |  |  |  |
|  | 1.3        | Assist team members when required.   |               |  |  |  |                          |  |  |  |
|  | 1.4        | Report to the appropriate personnel when requesting for assistance fall outside area of responsibility.    |               |  |  |  |                          |  |  |  |
|  | 1.5        | Communicate information to colleagues about own work that might affect others                              |               |  |  |  |                          |  |  |  |
| LO2: Recognise responsibilities within a team              | 2.1        | Recognize own role and responsibilities within the team.   |               |  |  |  |                          |  |  |  |
|  | 2.2        | Perform individual tasks in line with the team rules and regulations.                                      |               |  |  |  |                          |  |  |  |
|  | 2.3        | Participate effectively in teamwork  |               |  |  |  |                          |  |  |  |
| LO3: Comply with workshop policies                         | 3.1        | Work In line with workshop standard and structure.   |               |  |  |  |                          |  |  |  |

## Unit 6: Fastening and Joining Techniques in Tricycle Assembling and Repair Maintenance

**Unit reference number: AUT/TRC/004/L1**

**QCF level: 1**

**Credit value: 3**

**Guided learning hours: 30 HOURS**

**Unit Purpose:** This unit is about joining materials effectively using mechanical joining and fastening techniques

### Unit assessment requirements/evidence requirements:

This assessment can only be carried in a real workplace environment in which automotive tricycle service, repair, and mechanical joining and fastening operations are carried out.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Work products

| L.O (Learning outcome)  | Criteria:- | Evidence Type  | Evidence Ref Page number |
|---|------------|--|--------------------------|
| L.O:1.<br>Employ safety precautions in Mechanical Fastening and joining operations. | 1.1        | Use the appropriate Personal Protective Equipment when carrying out mechanical joining operation.                |                          |
|   | 1.2        | Identify how to Protect the tricycle and its contents effectively when carrying out mechanical joining operation |                          |
|   | 1.3        | Ensure that the tools, equipment and PPE you require are in a safe working condition                             |                          |
|   | 1.4        | Dress and protect the repaired area to inhibit corrosion where applicable  |                          |
|   | 1.5        | Clean and store PPE and equipment in appropriate manner  |                          |
|   | 1.6        | Confirm to health safety and legal requirements  |                          |

| L.O (Learning outcome) Criteria:-  |     |   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|---|---------------|--|--|--|--------------------------|--|--|--|
| L.O: 2.0<br>Utilise mechanical joining operations tools and equipment in tricycle assembling and repair maintenance. | 2.1 | Use the correct tools and equipment for carrying out mechanical joining operations  |               |  |  |  |                          |  |  |  |
|  | 2.2 | Identify the tools, equipment and PPEs require in a safe working condition  |               |  |  |  |                          |  |  |  |
|  | 2.3 | Explain how to check stability of tooling   |               |  |  |  |                          |  |  |  |
| L.O: 3.0<br>Employ joining/ fastening operations in tricycle assembling and repair maintenance.                      | 3.1 | Prepare material and align to enable suitable joint to be achieved  |               |  |  |  |                          |  |  |  |
|  | 3.2 | Polish meeting flanges before joining   |               |  |  |  |                          |  |  |  |
|  | 3.3 | Set up your equipment to carry out mechanical joining operations such as: <ul style="list-style-type: none"> <li>Check suitability of joining technique</li> <li>Check suitability of tooling</li> </ul> Check if consumables are correct |               |  |  |  |                          |  |  |  |
|  | 3.4 | Check integrity of the joint.   |               |  |  |  |                          |  |  |  |
|  | 3.5 | Use mechanical joining operations within the agreed timescale   |               |  |  |  |                          |  |  |  |
|  | 3.6 | Identify common fastener failures   |               |  |  |  |                          |  |  |  |

|                            |       |

**UNIT: 7 Engine System Maintenance in Tricycle Assembling and Repair Maintenance****Unit reference number: AUT/TRC/007/L1****QCF level: LEVEL 1****Credit value: 4****Guided learning hours: 40 HOURS**

**Unit Purpose: This unit is to equip learner with the knowledge and skills required in identifying faults, and carryout service repair on tricycle.**

**Unit assessment requirements/evidence requirements:**

This assessment can only be carried in a real workplace environment in which automotive tricycle service and repair operation are carried out in a workshop environment effectively. Live engines and functional tricycle shall be provided.

Assessment method will include:

- 1.Direct Observation (DO)
- 2.Question and Answer (QA)
- 3.Witness Testimony (WT)
- 4.Personal statement (PS)
- 5.Project
- 6.Work product

| L.O (Learning outcome)                              | Criteria:- |   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|---|------------|---|---------------|--|--|--|--------------------------|--|--|--|
| L.O. 1<br>Explain Tricycle Engine Configuration     | 1.1        | Identify types of tricycle engine   |               |  |  |  |                          |  |  |  |
|   | 1.2        | Identify components of a tricycle engine  |               |  |  |  |                          |  |  |  |
|   | 1.3        | State the function of each component of a tricycle engine   |               |  |  |  |                          |  |  |  |
|   | 1.4        | Describe the operations of a tricycle engine  |               |  |  |  |                          |  |  |  |
|   |            |   |               |  |  |  |                          |  |  |  |
| L.O. 2<br>Explain Tricycle engine routine servicing | 2.1        | Identify the tricycle engine system and components following the manufacturer's approved methods. |               |  |  |  |                          |  |  |  |
|   | 2.2        | Recognise correct tools for servicing a tricycle engine   |               |  |  |  |                          |  |  |  |
|   | 2.3        | Identify genuine filter, plug and lubricants in line with manufacturer's specification            |               |  |  |  |                          |  |  |  |
|   | 2.4        | Describe service procedures in the following:   |               |  |  |  |                          |  |  |  |

|                 | Total          |                                      | 26           | 260                 |           |

**Purpose of the Qualification:** This Qualification covers the competence and knowledge learners need to carry out maintenance, service and general repairs of auto tricycles. It includes identification of faults and replacement of mechanical and electrical components safely. The qualification also ensures that the learner is aware of health & safety, the environments, and appropriate communication. The candidate will use tools and equipment for the purpose of maintenance. It enables a candidate to dismantle 'live' components, for example engine, gearbox and back axle.

## Unit: 1 HEALTH, SAFETY AND ENVIRONMENT (HSE) IN TRICYCLE ASSEMBLING AND REPAIR MAINTENANCE

**Unit reference number:** AUT/TRC/001/L2

**QCF level:** 2

**Credit value:** 2

**Guided learning hours:** 20

**Unit Purpose:** This unit is about the application of knowledge and skills to competently carryout daily activities in an automotive tricycle workshop while observing relevant safety procedures and regulations.

### Unit assessment requirements/evidence requirements

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out. Simulation is not allowed in this unit and level.

Assessment method will include:

1. Direct Observation (DO) (QA)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome) Criteria:-                       |     |  | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|---|-----|--|---------------|--|--|--|--------------------------|--|--|--|
| L.O:1<br>Apply Workshop safety practices in a workplace | 1.1 | Implement safe work practice and instructions.                           |               |  |  |  |                          |  |  |  |
|   | 1.2 | Apply safety signs and symbols.  |               |  |  |  |                          |  |  |  |
|   | 1.3 | Use signs and symbols correctly  |               |  |  |  |                          |  |  |  |
|   | 1.4 | Carry out safe work practices and instructions                           |               |  |  |  |                          |  |  |  |
|   | 1.5 | Carry out work in accordance with health and safety practices.           |               |  |  |  |                          |  |  |  |
| L.O 2:<br>Explain Workshop hazards and risks            | 2.1 | Use work environment hazards   |               |  |  |  |                          |  |  |  |
|   | 2.2 | Describe the types of hazard and risks in surface area                   |               |  |  |  |                          |  |  |  |
|   | 2.3 | Explain risks in height and depth  |               |  |  |  |                          |  |  |  |
|   | 2.4 | Apply regulations as it relates to hazards and risk in work environment. |               |  |  |  |                          |  |  |  |
| L.O.3:  | 3.1 | Explain the types of PPEs  |               |  |  |  |                          |  |  |  |

| L.O (Learning outcome) Criteria:-  |     |   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|---|---------------|--|--|--|--------------------------|--|--|--|
| Use Personal Protective Equipment (PPE) as appropriate                     | 3.2 | Use PPEs in accordance with instructions.   |               |  |  |  |                          |  |  |  |
|  | 3.3 | Select appropriate PPEs.  |               |  |  |  |                          |  |  |  |
|  | 3.4 | Service PPEs after use.   |               |  |  |  |                          |  |  |  |
| L.O. 4: Manage workshop accidents  | 4.1 | Describe first aid facility   |               |  |  |  |                          |  |  |  |
|  | 4.2 | Use basic dressing materials  |               |  |  |  |                          |  |  |  |
|  | 4.3 | Carry out measure during accident with supervisor given instructions.                                     |               |  |  |  |                          |  |  |  |
| L.O. 5: Apply Safe work habits in the workshop environment                 | 5.1 | Use safe access and exit routes in the work environment   |               |  |  |  |                          |  |  |  |
|  | 5.2 | Test appropriate working tools, materials and equipment   |               |  |  |  |                          |  |  |  |
|  | 5.3 | Use tools and equipment safely in accordance with the supervisors instructions                            |               |  |  |  |                          |  |  |  |
|  | 5.4 | Assemble all tools, equipment and unused materials for appropriate storage                                |               |  |  |  |                          |  |  |  |
|  | 5.5 | Carry out general housekeeping of work environment  |               |  |  |  |                          |  |  |  |
| L.O: 6. Practice lifting, stacking, and loading/offloading in the Workshop | 6.1 | Use lifting and stacking techniques   |               |  |  |  |                          |  |  |  |
|  | 6.2 | Carry out appropriately lifting techniques in loading and offloading of materials without assistance      |               |  |  |  |                          |  |  |  |
|  | 6.3 | Perform correct lifting and loading techniques with mechanical assistance                                 |               |  |  |  |                          |  |  |  |
|  | 6.4 | Assemble materials correctly  |               |  |  |  |                          |  |  |  |
| L.O: 7 Handle flammable and inflammable substances.                        | 7.1 | Recognise the effect of gas, liquid and solid materials on self and work environment                      |               |  |  |  |                          |  |  |  |
|  | 7.2 | Use various types of protection against gaseous, liquid, and solid materials on self and work environment |               |  |  |  |                          |  |  |  |
|  | 7.3 | Use appropriate legislative standards with regards to safety  |               |  |  |  |                          |  |  |  |

**UNIT 2: COMMUNICATION IN TRICYCLE ASSEMBLING AND REPAIR MAINTENANCE****Unit reference number: AUT/TRC/002/L2****QCF level: 2****Credit value: 2****Guided learning hours: 20**

**Unit Purpose:** To establish an effective communication system that is responsive to change in meeting workers and client's needs in work environment

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)

| L.O (Learning outcome)  |     | Criteria:-   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|---|-----|--|---------------|--|--|--|--------------------------|--|--|--|
| L.O:1<br>Use non-complex communication system in a work environment | 1.1 | Use a verbal means to pass on necessary information  |               |  |  |  |                          |  |  |  |
|   | 1.2 | Use non-verbal means to convey necessary information e.g. body language, signs                                 |               |  |  |  |                          |  |  |  |
|   | 1.3 | Recognise symbols and signs appropriately  |               |  |  |  |                          |  |  |  |
| L.O: 2<br>RElate information in a work environment effectively.     | 2.1 | Recognise the source of information in the work environment  |               |  |  |  |                          |  |  |  |
|   | 2.2 | Communicate effectively with the source of information   |               |  |  |  |                          |  |  |  |
|   | 2.3 | Use the different information flow systems in a work environment   |               |  |  |  |                          |  |  |  |
|   | 2.4 | Use information gathered to avoid challenges in a work situation   |               |  |  |  |                          |  |  |  |
|   | 2.5 | Report findings appropriately in accordance with laid down procedure in the work environment Cards, Flip Chart |               |  |  |  |                          |  |  |  |

**Unit 3: TEAM WORK****Unit reference number: AUT/TRC/003/L2****level: 2****Credit value: 1****Guided learning hours: 10**

**Unit Purpose:** The purpose of this unit is to impart to the learner, skills, knowledge and understanding required to develop team spirit and positive working relationship.

**Unit assessment requirements/evidence requirements:** Assessment must be carried out in real workplace environment in which automotive services and repair operations are carried out. Simulation is not allowed in this unit and level.

Assessment methods will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome)                                       | Criteria:- | Evidence Type  | Evidence Ref Page number |
|--|------------|--|--------------------------|
| LO1:<br>Utilize relationship with colleagues in a work place | 1.1        | Identify the need for developing positive relationship with colleagues.                                    |                          |
|  | 1.2        | Recognize the importance of relating with other people in a way that makes them feel valued and respected. |                          |
|  | 1.3        | Assist team members when required.   |                          |
|  | 1.4        | Report to the appropriate personnel when requesting for assistance fall outside area of responsibility.    |                          |
|  | 1.5        | Communicate information to colleagues about own work that might affect others                              |                          |
| LO2:<br>Utilise team work in a work place                    | 2.1        | Recognize own role and responsibilities within the team.   |                          |
|  | 2.2        | Perform individual tasks in line with the team rules and regulations.                                      |                          |

**UNIT: 4 ENGINE SYSTEM MAINTENANCE.****Unit reference number: AUT/TRC/004/L2****QCF level: LEVEL 2****Credit value: 5****Guided learning hours: 50 HOURS**

**Unit Purpose:** This unit is to equip learner with knowledge and skills required in fault identification, and repairs in tricycle engine maintenance.

**Unit assessment requirements/evidence requirements:**

This assessment can only be carried in a real workplace environment in which automotive tricycle service and repair operation are carried out in a workshop environment effectively. Live engines and functional tricycle shall be provided.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome) Criteria:-                         |     |   | Evidence Type |  |  |  | Evidence page number |  |  |  |
|---|-----|---|---------------|--|--|--|----------------------|--|--|--|
| L0 1.<br>Practice periodic maintenance on tricycle engine | 1.1 | Explain periodic maintenance  |               |  |  |  |                      |  |  |  |
|   | 1.2 | Identify the tricycle engine system                                     |               |  |  |  |                      |  |  |  |
|   | 1.3 | Identify the various types of components in tricycle engine             |               |  |  |  |                      |  |  |  |
|   | 1.4 | Carry out the periodic maintenance                                      |               |  |  |  |                      |  |  |  |
| L.O2.<br>Utilise procedures for Servicing tricycle engine | 2.1 | Identify the faults by visual inspection, direct observation and sound. |               |  |  |  |                      |  |  |  |
|   | 2.2 | Use manufacturer's service information                                  |               |  |  |  |                      |  |  |  |
|   | 2.3 | Identify tools/equipment for tricycle servicing                         |               |  |  |  |                      |  |  |  |

## UNIT: 5 STEERING, SUSPENSION, TYRES & WHEEL IN TRICYCLE ASSEMBLING AND REPAIR MAINTENANCE

**Unit reference number:** AUT/TRC/005/L2

**QCF level:** 2

**Credit value:** 6

**Guided learning hours:** 60

**Unit Purpose:** This unit is to equip learner with the requisite knowledge and skills on how to assemble, repair and service steering, suspension, tyres and wheels of tricycle.

### Unit assessment requirements/evidence requirements;

This assessment can only be carried out in a real automotive tri-cycle workshop environment in which replacement and repair procedures for wheels, tyres, steering & suspensions are carried out.

Assessment methods will include

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome)  |     | Criteria:-  | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|---|-----|---|---------------|--|--|--|--------------------------|--|--|--|
| L.O:1<br>Perform Steering servicing , maintenance and repair. | 1.1 | Identify faults relating to steering  |               |  |  |  |                          |  |  |  |
|   | 1.2 | Select correct tools  |               |  |  |  |                          |  |  |  |
|   | 1.3 | Dismantle the steering units  |               |  |  |  |                          |  |  |  |
|   | 1.4 | Service the steering bearings   |               |  |  |  |                          |  |  |  |
|   | 1.5 | Service the steering bushings   |               |  |  |  |                          |  |  |  |
|   | 1.6 | Replace damaged parts such as: steering bushings steering bearing (top and bottom) centre bearing |               |  |  |  | wi                       |  |  |  |
|   | 1.7 | Couple the unit back  |               |  |  |  |                          |  |  |  |
|   | 1.8 | Test run  |               |  |  |  |                          |  |  |  |
| L.O: 2.<br>Service and repair Tricycle suspension system.     | 2.1 | Identify faults in shock absorber   |               |  |  |  |                          |  |  |  |
|   | 2.2 | Identify faults in linkages   |               |  |  |  |                          |  |  |  |
|   | 2.3 | Identify faults in suspension bushings  |               |  |  |  |                          |  |  |  |
|   | 2.4 | Select correct working tools  |               |  |  |  |                          |  |  |  |
|   | 2.5 | Dismantle suspension unit   |               |  |  |  |                          |  |  |  |

| L.O (Learning outcome)                                     |     | Criteria:-  | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|---|---------------|--|--|--|--------------------------|--|--|--|
|  | 2.6 | Replace damaged parts such as:<br>shock absorber (Oil seal and spring)<br>linkages<br>suspension bushings |               |  |  |  |                          |  |  |  |
|  | 2.7 | Couple back the unit  |               |  |  |  |                          |  |  |  |
|  | 2.8 | Test run  |               |  |  |  |                          |  |  |  |
| L.O.3:<br>Carry out Tricycle tyre repair and maintenance.  | 3.1 | Identify types of tyre and tubes used in Tri-cycles   |               |  |  |  |                          |  |  |  |
|  | 3.2 | Use correct tools and techniques  |               |  |  |  |                          |  |  |  |
|  | 3.3 | Remove tire from the wheel  |               |  |  |  |                          |  |  |  |
|  | 3.4 | Check for leakages  |               |  |  |  |                          |  |  |  |
|  | 3.5 | Repair tube and tyre  |               |  |  |  |                          |  |  |  |
|  | 3.6 | Inflate tyre according to the manufacturer's specification  |               |  |  |  |                          |  |  |  |
| L.O.4<br>Carry out Tricycle wheel alignment and balancing. | 4.1 | Check wheel alignment and balancing.  |               |  |  |  |                          |  |  |  |
|  | 4.2 | Identify causes of miss-alignment   |               |  |  |  |                          |  |  |  |
|  | 4.3 | Remove wheel from hub with correct tools.   |               |  |  |  |                          |  |  |  |
|  | 4.4 | Check the bearing and bushing   |               |  |  |  |                          |  |  |  |
|  | 4.5 | Replace the damaged bearing and bushing   |               |  |  |  |                          |  |  |  |
|  | 4.6 | Assemble the wheel  |               |  |  |  |                          |  |  |  |
|  | 4.7 | Test run  |               |  |  |  |                          |  |  |  |

**UNIT: 6 ELECTRICAL WORK & ENHANCEMENT****Unit reference number: AUT/TRC/006/L2****QCF level: 2****Credit value: 6****Guided learning hours: 60**

**Unit Purpose:** This unit is to equip learner with the requisite knowledge and skills on how to remove and refit basic electrical components on tricycles

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real tricycle workplace environment in which the removal and fitting of basic mechanical, electrical components are carried out.

Assessment methods will include

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Work product

| L.O (Learning outcome)                          |     | Criteria:-   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |

**NOTE:** Learners are required to select 1 unit from the optional units

**Purpose of the Qualification:** This Qualification covers the competence and knowledge learners need to carry out maintenance, service and general repairs of auto tricycles. It includes identification of faults and replacement of mechanical, solar power components, and engine overhauling safely. The qualification also ensures that the learner is aware of health & safety, the environments, and appropriate communication. The candidate will use tools and equipment for the purpose of maintenance. It enables a candidate to dismantle 'live' components, for example engine, gearbox and back axle.

## Unit: 1 HEALTH, SAFETY AND ENVIRONMENT (HSE) IN TRICYCLE ASSEMBLING AND REPAIR MAINTENANCE WORKPLACE

**Unit reference number:** AUT/TRC/001/L3

**QCF level:** 3

**Credit value:** 2

**Guided learning hours:** 20

**Unit Purpose:** This unit is to equip learner with the required knowledge and skills required to work safely an automotive tricycle assembly and maintenance workshop.

### Unit assessment requirements/evidence requirements

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out. Simulation is not allowed in this unit and level.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer/ oral questions (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product
7. Project

| L.O (Learning outcome)                           | Criteria:- | Evidence Type  | Evidence Ref Page number |
|--|------------|--|--------------------------|
| LO 1. Practice Personal Health and Hygiene       | 1.1        | Wear clean, smart and appropriate Personal Protective Equipment (wears)                              |                          |
|  | 1.2        | Work safely at all times, complying with health, safety and environmental regulations and guidelines |                          |
|  | 1.3        | Get cuts, grazes and wounds treated by the appropriate personnel.                                    |                          |
|  | 1.4        | Report any form of illness promptly to the appropriate personnel.                                    |                          |
| LO 2:<br>Explain how to maintain Personal Health | 2.1        | State own responsibility in the health and safety Act as it relates to own occupation                |                          |

| L.O (Learning outcome)  | Criteria:- | Evidence Type   |  |  |  |  |  | Evidence Ref | Page number |
|---|------------|---|--|--|--|--|--|--------------|-------------|
| and Hygiene   |            |   |  |  |  |  |  |              |             |
|   | 2.2        | State general rules on hygiene that must be followed  |  |  |  |  |  |              |             |
|   | 2.3        | State the Personal Protection Equipment (PPE) (such as Head Protection, Foot Protection, Hand and body protection) and regulatory protection. |  |  |  |  |  |              |             |
|   | 2.4        | State the importance of maintaining good personal hygiene   |  |  |  |  |  |              |             |
|   | 2.5        | Describe how to deal with cuts, grazes and wounds and why it is important to do s   |  |  |  |  |  |              |             |
| LO 3.<br>Assist in the maintenance of a hygienic, safe and secure workplace | 3.1        | State the importance of working in a healthy, safe and hygienic workplace   |  |  |  |  |  |              |             |
|   | 3.2        | Report any accidents or near misses quickly and accurately to the proper personnel  |  |  |  |  |  |              |             |
|   | 3.3        | Follow health, hygiene and safety procedure at work   |  |  |  |  |  |              |             |
|   | 3.4        | Practice emergency procedures during work   |  |  |  |  |  |              |             |
|   | 3.5        | Follow organizational security procedures and measures  |  |  |  |  |  |              |             |
|   | 3.6        | Ensure the disposal of waste and pollution control with organic and inorganic waste   |  |  |  |  |  |              |             |
|   | 3.7        | Follow noise control and protection methods.  |  |  |  |  |  |              |             |
| L.O 4.<br>Explain the Prevention of hazards in the work place               | 4.1        | Identify any potential hazards and deal with these correctly  |  |  |  |  |  |              |             |
|   | 4.2        | Explain where information about health, safety and environment in the workplace can be obtained. l  |  |  |  |  |  |              |             |
|   | 4.3        | Describe the types of hazards in the workplace that may occur and how to deal with them   |  |  |  |  |  |              |             |
|   | 4.4        | Explain hazards that can be dealt with personally and those that should be reported to the appropriate personnel                              |  |  |  |  |  |              |             |

**UNIT 2: COMMUNICATION IN AUTO TRICYCLE WORKSHOP****Unit reference number: AUT/TRC/002/L3****QCF level: 3****Credit value: 2****Guided learning hours: 20**

**Unit Purpose:** To establish an effective communication system that is responsive to change in meeting workers and client's needs, in work environment

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer(QA)
3. Witness Testimony (WT)
4. Personal statement (PS)

| L.O (Learning outcome)   | Criteria:- | Evidence Type   |  |  |  |  |  | Evidence Ref Page number |
|--|------------|---|--|--|--|--|--|--------------------------|
| LO1:<br>Apply Non-complex communication system in a work environment | 1.1        | Use a simple verbal means to pass on necessary information.               |  |  |  |  |  |                          |
|  | 1.2        | Use non-verbal means to pass on necessary information e.g. body language. |  |  |  |  |  |                          |
|  | 1.3        | Identify and explain symbols and signs appropriately                      |  |  |  |  |  |                          |
|  | 2.1        | Identify the source of information in workshop and work environment.      |  |  |  |  |  |                          |
| LO2:<br>Utilise Information source in a work environment.            | 2.2        | Relate appropriately with the source of information.                      |  |  |  |  |  |                          |
|  | 2.3        | Use the various information flow systems in a work environment.           |  |  |  |  |  |                          |
|  | 2.4        | Use information sources to address challenges in a work environment.      |  |  |  |  |  |                          |
|  | 2.5        | Communicate findings in accordance to procedure in a work environment     |  |  |  |  |  |                          |

### Unit 3: CUSTOMER RELATIONS IN TRICYCLE ASSEMBLING, REPAIRS AND MAINTENANCE WORKPLACE

**Unit reference number:** AUT/TRC/032/L3

**QCF level:** 3

**Credit value:** 3

**Guided learning hours:** 30 HOURS

**Unit Purpose:** This unit is about gaining information from customers on their perceived needs, ascertain the scope of work, giving advice and information and agreeing a course of action, contracting for the agreed work and completing all necessary records and instructions.

**Unit assessment requirements:** This assessment can only be carried out in a real automotive workplace environment.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Work product
6. Project.

| L.O (Learning outcome)  | Criteria:- | Evidence Type   |  | Evidence Ref Page number |
|---|------------|---|--|--------------------------|
| L.O. Explain customers communication  | 1.1        | Explain the term Customer Relation  |  |                          |
|   | 1.2        | Explain the term Communication  |  |                          |
|   | 1.3        | Discuss types and methods of Communication.   |  |                          |
|   | 1.4        | Gather relevant information from the customer to make an assessment of perceived tricycle needs.  |  |                          |
|   | 1.5        | Analyze and clarify customers complaints during conversation.   |  |                          |
|   | 1.6        | Document customer's understanding of the requirements you have made.  |  |                          |
| L.O. 2: Use Customers' complaint documentation in tricycle assembly and maintenance workshop. | 2.1        | Carryout accurate identification and clarification of customer needs.   |  |                          |
|   | 2.2        | Discuss the following with the customer before accepting the tricycle; <ul style="list-style-type: none"> <li>Physical inventory of tricycle</li> </ul> |  |                          |

| L.O (Learning outcome)                         | Criteria:-   | Evidence Type  | Evidence Ref Page number |
|--|--|--|--------------------------|
|  | <ul style="list-style-type: none"> <li>Extent and nature of the work to be undertaken</li> <li>Terms and conditions of acceptance</li> <li>Cost</li> <li>Timeframe.</li> </ul>   |  |                          |
|  | 2.3 Provide customers with accurate, current and relevant information on: <ul style="list-style-type: none"> <li>Suitable tricycle inspection, repair/parts replacement</li> <li>Potential causes of action</li> <li>The consequences of the action</li> <li>The estimated cost</li> </ul> |  |                          |
| L.O.3<br>Utilise Customer Follow Up Procedures | 4.1  | Compile further customer approval where the contracted agreement is likely to be exceeded. |                          |
|  | 4.2  | Describe how to get feedback from customers.   |                          |
|  | 4.3  | Carryout customer satisfaction survey.   |                          |
|  | 4.4  | Obtain customer feedback on completed jobs.  |                          |
|  | 4.5  | Analyze customer feedback  |                          |

**UNIT: 5 Tricycle Engine overhauling****Reference number: AUT/TRC/005/L3****QCF level: LEVEL 3****Credit value: 6****Guided learning hours: 60 HOURS**

**Unit Purpose:** This unit is to equip learner with the requisite knowledge and skills required to overhaul tricycle engine.

**Unit assessment requirements/evidence requirements:**

This assessment can only be carried in an environment in which automotive tricycle assembly are carried out in a commercial environment effectively.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome) Criteria:-                        |     |   | Evidence Type |  |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|---|---------------|--|--|--|--|--------------------------|--|--|--|
| L.O. 1<br>Conduct Tricycle engine overhauling procedures | 1.1 | Identify engine fault                           |               |  |  |  |  |                          |  |  |  |
|  | 1.2 | Select correct tools use in overhauling         |               |  |  |  |  |                          |  |  |  |
|  | 1.3 | Drain engine oil and Disconnect battery.        |               |  |  |  |  |                          |  |  |  |
|  | 1.4 | Remove engine from the tricycle frame.          |               |  |  |  |  |                          |  |  |  |
| L.O. 2<br>Carry out Tricycle engine dismantling          | 2.1 | Remove external components: exhaust manifold    |               |  |  |  |  |                          |  |  |  |
|  | 2.2 | starter motor removal                           |               |  |  |  |  |                          |  |  |  |
|  | 2.3 | Cylinder head removal                           |               |  |  |  |  |                          |  |  |  |
|  | 2.4 | Piston and crankshaft removal                   |               |  |  |  |  |                          |  |  |  |
|  | 2.5 | Inspect all components                          |               |  |  |  |  |                          |  |  |  |
| L.O3   | 3.1 | Demonstrate cleaning of removed component parts |               |  |  |  |  |                          |  |  |  |

| L.O (Learning outcome) Criteria:-                        |     |   | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|---|---------------|--|--|--|--------------------------|--|--|--|
| Conduct Tricycle component parts cleaning and inspection | 3.2 | Inspect cylinder head for wears and cracks  |               |  |  |  |                          |  |  |  |
|  | 3.3 | Check valve seat and guide for wears and cracks.                                  |               |  |  |  |                          |  |  |  |
|  | 3.4 | Inspect pistons and rings for wears   |               |  |  |  |                          |  |  |  |
|  | 3.5 | Inspect crankshaft and connecting rods:   |               |  |  |  |                          |  |  |  |
|  | 3.6 | Lubricate all component parts inspected accordingly.                              |               |  |  |  |                          |  |  |  |
| L.O.4 Assemble Tricycle engine                           | 4.1 | Install pistons and crankshaft  |               |  |  |  |                          |  |  |  |
|  | 4.2 | Install cylinder head   |               |  |  |  |                          |  |  |  |
|  | 4.3 | Reassemble external components  |               |  |  |  |                          |  |  |  |
|  | 4.4 | Reinstall engine in the tricycle frame  |               |  |  |  |                          |  |  |  |
|  | 4.5 | Check to ensure coolant and lubricant are applied to component parts as required. |               |  |  |  |                          |  |  |  |
|  | 4.6 | Test assembled engine in line with manufacturer's procedures.                     |               |  |  |  |                          |  |  |  |
|  |     |   |               |  |  |  |                          |  |  |  |

**Important Notes:**

**Cleanliness is crucial:** Keep your workspace and all engine components clean to prevent contamination.

**UNIT: 7 TRICYCLE BRAKE SYSTEM REPAIR AND MAINTENANCE****Unit reference number: AUT/TRC/007/L3****QCF level: 3****Credit value: 5****Guided learning hours: 50**

**Unit Purpose:** This unit is to equip learner with the requisite knowledge and skills required to carryout tricycle break repairs.

**Unit assessment requirements/evidence requirements**

This assessment can only be carried out in a real automotive tricycle workplace environment where automotive activities are carried out. Simulation is not allowed in this unit and level.

Assessment method will include:

1. Direct Observation (DO)
2. Question and Answer (QA)
3. Witness Testimony (WT)
4. Personal statement (PS)
5. Project
6. Work product

| L.O (Learning outcome) Criteria:-  |     |  | Evidence Type |  |  |  | Evidence Ref Page number |  |  |  |
|--|-----|--|---------------|--|--|--|--------------------------|--|--|--|
| L.O:1.<br>Perform Tricycle brake system servicing according to procedures. | 1.1 | Identify faults in braking system  |               |  |  |  |                          |  |  |  |
|  | 1.2 | Service the wheel brake pots with the correct tools  |               |  |  |  |                          |  |  |  |
|  | 1.3 | Service wheel pot pistons/ pot rubber  |               |  |  |  |                          |  |  |  |
|  | 1.4 | Test run the serviced tricycle   |               |  |  |  |                          |  |  |  |
| L.O: 2<br>Conduct Tricycle brake system repair according to procedures.    | 2.1 | Identify faults for repair   |               |  |  |  |                          |  |  |  |
|  | 2.2 | Select correct tools/equipment   |               |  |  |  |                          |  |  |  |
|  | 2.3 | Dismantle braking system.  |               |  |  |  |                          |  |  |  |
|  | 2.4 | Replace damaged parts such as: <ul style="list-style-type: none"> <li>• brake master cylinder kits</li> <li>• fluid container</li> <li>• broken hydraulic pipe</li> <li>• brake wheel pot</li> <li>• brake wheel kits</li> </ul> |               |  |  |  |                          |  |  |  |
